The “API Economy” is a popular term among VC’s and tech media, but I find it curiously unappreciated by developers. I think this is partly because developers know this revolution by other names (“SaaS” or “Devtools”) and partly because the term is *more* popular among nontechnical audiences. **This causes developers to severely underestimate the importance of the API Economy to their own careers.**

Found on The Light and Dark Side of the API Economy on 2022-02-06 16:39:44.
