Software development today is embracing events and streaming data, which optimizes not only how technology interacts but also how businesses integrate with one another to meet customer needs. This phenomenon, called flow, consists of patterns and standards that determine which activity and related data is communicated between parties over the internet.

Found on Flow Architectures: The Future of Streaming and Event-Driven Integration - James Urquhart (VMWare) - YouTube on 2022-02-09 09:47:01.
